## DETAILED ACTION

### *Reasons for Allowance*

1. The following is an examiner's statement of reasons for allowance:

Regarding claims 4, 7 and 23, the previous art of record teaches of a process and apparatus for reducing electrical consumption of a transmitter/receiver device comprising a frequency synthesizer stage controlled by an automatic frequency control algorithm, the process comprising: generating at least one reference signal for a transmission/reception stage within the transmitter/receiver device, the at least one reference signal being generated based upon at least one first fractional-division phase-locked loop within the frequency synthesizer stage; generating a clock signal based upon a second fractional-division phase-locked loop within the frequency synthesizer stage, generating a base signal for the at least one first fractional-division phase-locked loop and the second fractional-division phase-locked loop.

The previous art of record does not teach of the base signal **having a second accuracy less than the first accuracy**; and **delivering the base signal as a master-clock signal** to a modulator/demodulator connected to the transmission/reception stage **when the transmission/reception stage and the second fractional-division phase-locked loop are inactive** and **delivering the clock signal as the master-clock signal when the transmission/reception stage and the second fractional-division phase-locked loop are active**.

Regarding claim 16, the previous art of record teaches of a process for reducing electrical consumption within a transmitter/receiver device, the process comprising:

Art Unit: 2684

generating at least one first clock signal at a first accuracy at a first power level for a transmission/reception stage and a modulator/demodulator when the transmission/reception stage is active; and generating a second clock signal.

The previous art of record fails to teach where the generated second clock signal is generated at a **second accuracy less than the first accuracy** and at a **second power level less than the first power level for the modulator/demodulator when the transmission/reception stage is inactive.**

Claims 5-6, 8-15, 17-22 and 23-32 are dependent upon claims 4, 7, 16 and 23, respectively; therefore, the examiner gives the same reasons for allowance as discussed in claims 4, 7, 16 and 23.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
